Draw • Write • NOW[®]

By Marie Hablitzel
and Kim Stitzer

A Drawing and Handwriting Course for Kids!

Handwriting is an Art!

Practice Handwriting Carefully

1. Sit up straight.
2. Hold your pencil correctly.
3. Use the paper guidelines.
4. Form each letter carefully.
5. Space the words evenly.
6. Practice daily.

The more you practice,
the better your writing will look!

A few tips to get started...

This is a book for children and their parents, teachers and caregivers. Although most young people can complete the lessons in this book quite successfully on their own, a little help and encouragement from a caring adult can go a long way toward building a child's self-confidence, creativity and technical skills.

*South American Llama by Michelle Stitzer, age 7
from Draw•Write•Now®, Book Seven*

The following outline contains insights from the 30-plus years the authors have worked with the material in this book. Realizing that no two children or classrooms are alike, the authors encourage you to modify these lessons to best suit the needs of your child or classroom. Each *Draw•Write•Now®* lesson includes five parts:

1. Introduce the subject.
2. Draw the subject.
3. Draw the background.
4. Practice handwriting.
5. Color the drawing.

As presented here, each child will need a pencil, an eraser, drawing paper, penmanship paper and either crayons, color pencils or felt tip markers to complete a lesson.

1. Introduce the Subject

Begin the lesson by generating interest in the subject with a story, discussion, poem, photograph or song. The questions on the illustrated notes scattered

throughout this book are examples of how interest can be built along a related theme. Answers to these questions and the titles of several theme-related books are on pages 32, 50 and 62.

2. Draw the Subject

Have the children draw with a pencil. Encourage them to draw lightly because some lines (shown as dashed lines on the drawing lessons) will need to be erased. Show the children the finished drawing in the book. Point out the shapes and lines in the subject as the children work through the lesson. Help the children see that complex objects can be viewed as combinations of lines and simple shapes.

Help the children be successful! Show them how to position the first step on their papers in an appropriate size. Initially, the children may find some shapes difficult to draw. If they do, provide a pattern for them to trace, or draw the first step for them. Once they fine-tune their skills and build their self-confidence, their ability and creativity will take over. For lesson-specific drawing tips and suggestions, refer to *Teaching Tips* on pages 63–64.

3. Draw the Background

Encourage the children to express their creativity and imagination in the backgrounds they add to their pictures. Add to their creative libraries by demonstrating various ways to draw trees, horizons and other details. Point out background details in the drawings in this book, illustrations from other books, photographs and works of art.

Encourage the children to draw their world by looking for basic shapes and lines in the things they see around them. Ask them to draw from their imaginations by using their developing skills. For additional ideas on motivating children to draw creatively, see pages 30–31, 48–49 and 60–61.

4. Practice Handwriting

In place of drills—rows of e's, r's and so on—it is often useful and more motivating to have children write complete sentences when practicing their handwriting. When the focus is on handwriting—

rather than spelling or vocabulary enrichment—use simple words that the children can easily read and spell. Begin by writing each word with the children, demonstrating how individual letters are formed and stressing proper spacing. Start slowly. One or two sentences may be challenging enough in the beginning. Once the children are consistently forming their letters correctly, encourage them to work at their own pace.

There are many ways to adapt these lessons for use with your child or classroom. For example, you may want to replace the authors' text with your own words. You may want to let the children compose sentences to describe their drawings or answer the theme-related questions found throughout the book. You may prefer to replace the block alphabet used in this book with a cursive, D'Nealian® or other alphabet style. If you are unfamiliar with the various alphabet styles used for teaching handwriting, consult your local library. A local elementary school may also be able to recommend an appropriate alphabet style and related resource materials.

5. Color the Picture

Children enjoy coloring their own drawings. The beautiful colors, however, often cover the details they have so carefully drawn in pencil. To preserve their efforts, you may want to have the children trace their pencil lines with black crayons or fine-tipped felt markers.

Crayons—When coloring with crayons, have the children outline their drawings with a black crayon

"Batter up!" by Tyler Stitzer, age 5
from Draw•Write•Now®, Book One

Eskimo by Marianne Hablitzel, age 8
from Draw•Write•Now®, Book Four

Fish by Sam Hablitzel, age 6
from Draw•Write•Now®, Book Six

after they have colored their pictures (the black crayon may smear if they do their outlining first).

Color Pencils—When coloring with color pencils, have the children outline their drawings with a felt tip marker *before* they color their drawings.

Felt Tip Markers—When coloring with felt tip markers, have the children outline their drawings with a black marker *after* they have colored their pictures.

Your comments are appreciated!

How are you sharing Draw•Write•Now® with your children or students? The authors would appreciate hearing from you. Write to Marie Hablitzel and Kim Stitzer, c/o Barker Creek Publishing, P.O. Box 2610, Poulsbo, WA 98370, USA or visit our website at www.barkercreek.com.

Birds fly in the sky.

They build nests.

They eat bugs and worms.

We like to hear them sing.

What color
are the birds
near your home?

Birds
